DETAILED ACTION

Response to Amendment

The receipt of preliminary amendment of 4/20/2005 is acknowledged. Claims 1, 3, 6, 8-17, 20-22, 43, 51, 56, and 62 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 9-10, 16, 17, 20-22, 43, drawn to method of treating CIN in an individual 30 years or younger.

Group II, claim(s) 3, 11-15, drawn to method of treating an HPV-mediated disease in human.

Group III, claim(s) 8, drawn to a kit comprising nucleic acid sequence encoding polypeptide.

Group IV, claim(s) 51, drawn to method of treating CIN in human administering a hybrid of EPV E6 and HPV E7 protein .

Group V, claim(s) 56, drawn to method of treating HPV-mediated disease administering a hybrid of EPV E6 and HPV E7 protein .

Group VI, claim(s) 62, drawn to method of selecting a treatment for an individual wherein individual is identified as having an HPV-mediated disease.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special

Art Unit: 1648

technical features for the following reasons: The invention of Group I is known in the prior art as evidence by Edwards et al (WO 96/19496) wherein the reference teaches method of eliciting humoral or cellular response by administering human papillomavirus proteins (see the abstract, claims 18, 19). Also, see teaching by Gupta et al (US Patent No. 6,280,740 B1) wherein the patent taught formulation of early proteins for treatment of a cause of cervical cancer (see claim 1, and column 5, lines 6-12) The cited evidence prove that the technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
